[Interface](#)

[Logging](#)

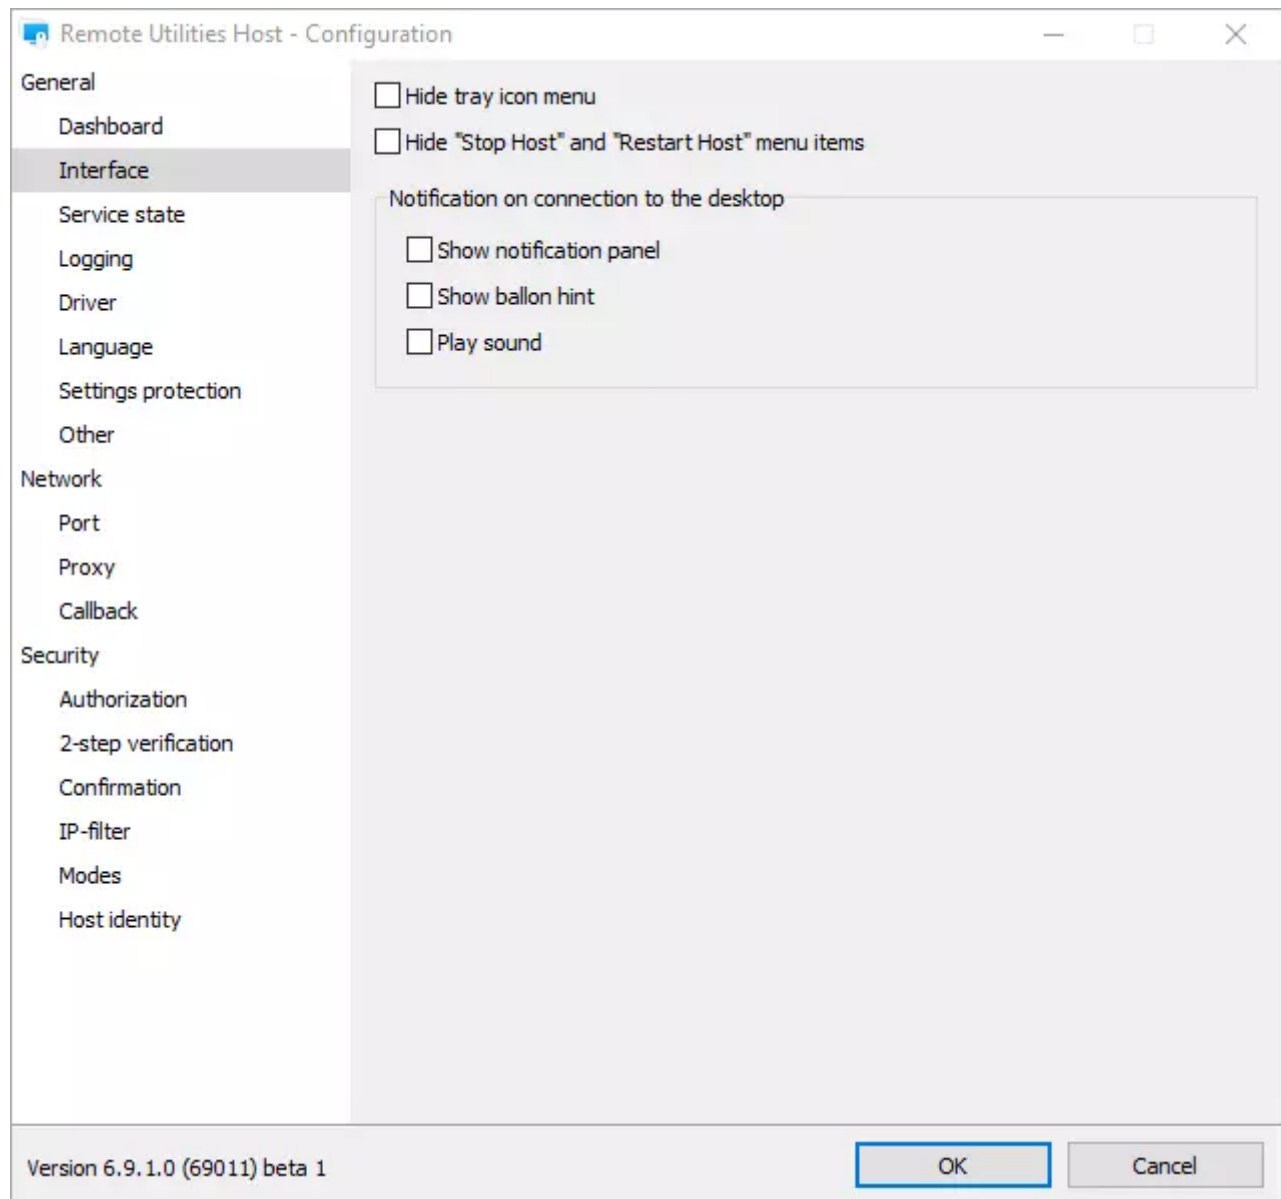

[Driver](#)

[Language](#)

[Other](#)

Host options that are not covered on their own dedicated pages are listed here.

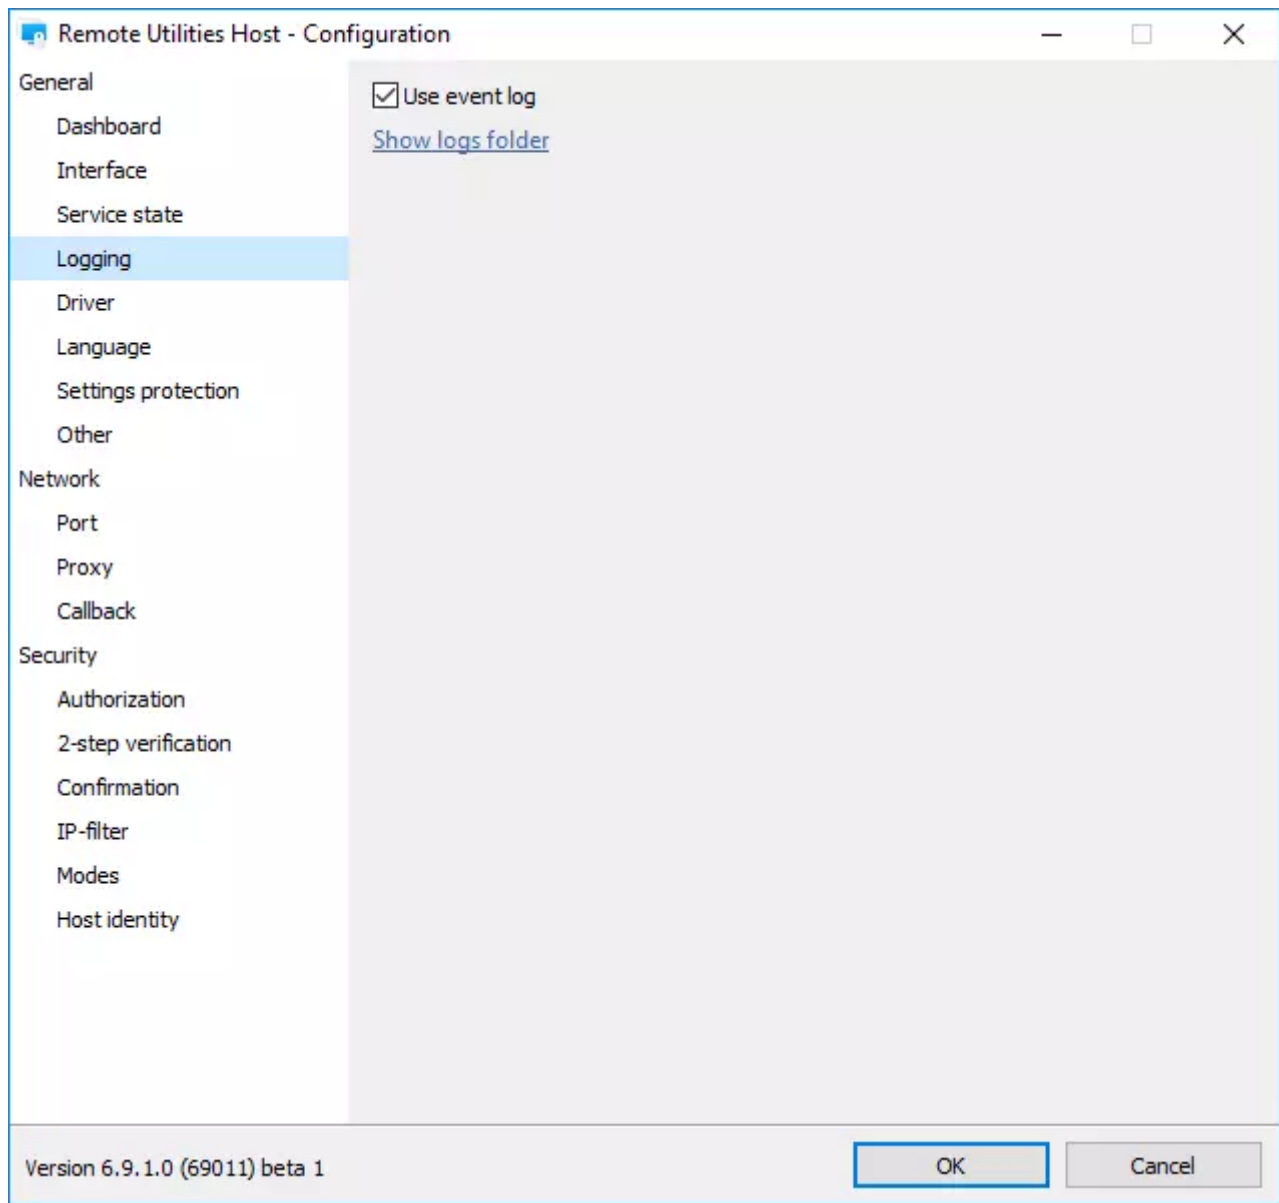

Interface

- **Hide tray icon menu** – do not display the Host menu when right-clicking the Host icon in the system tray
- **Hide Stop Host and Restart Host menu items** - remove the corresponding items from the tray icon menu (Host restart needed to apply this option)

- **Show notification panel** - show *notification panel* (Host restart needed to apply this option)
- **Show balloon hint** - show a standard Windows balloon hint when the remote connection is established
- **Play sound** - play sound when the remote connection is established

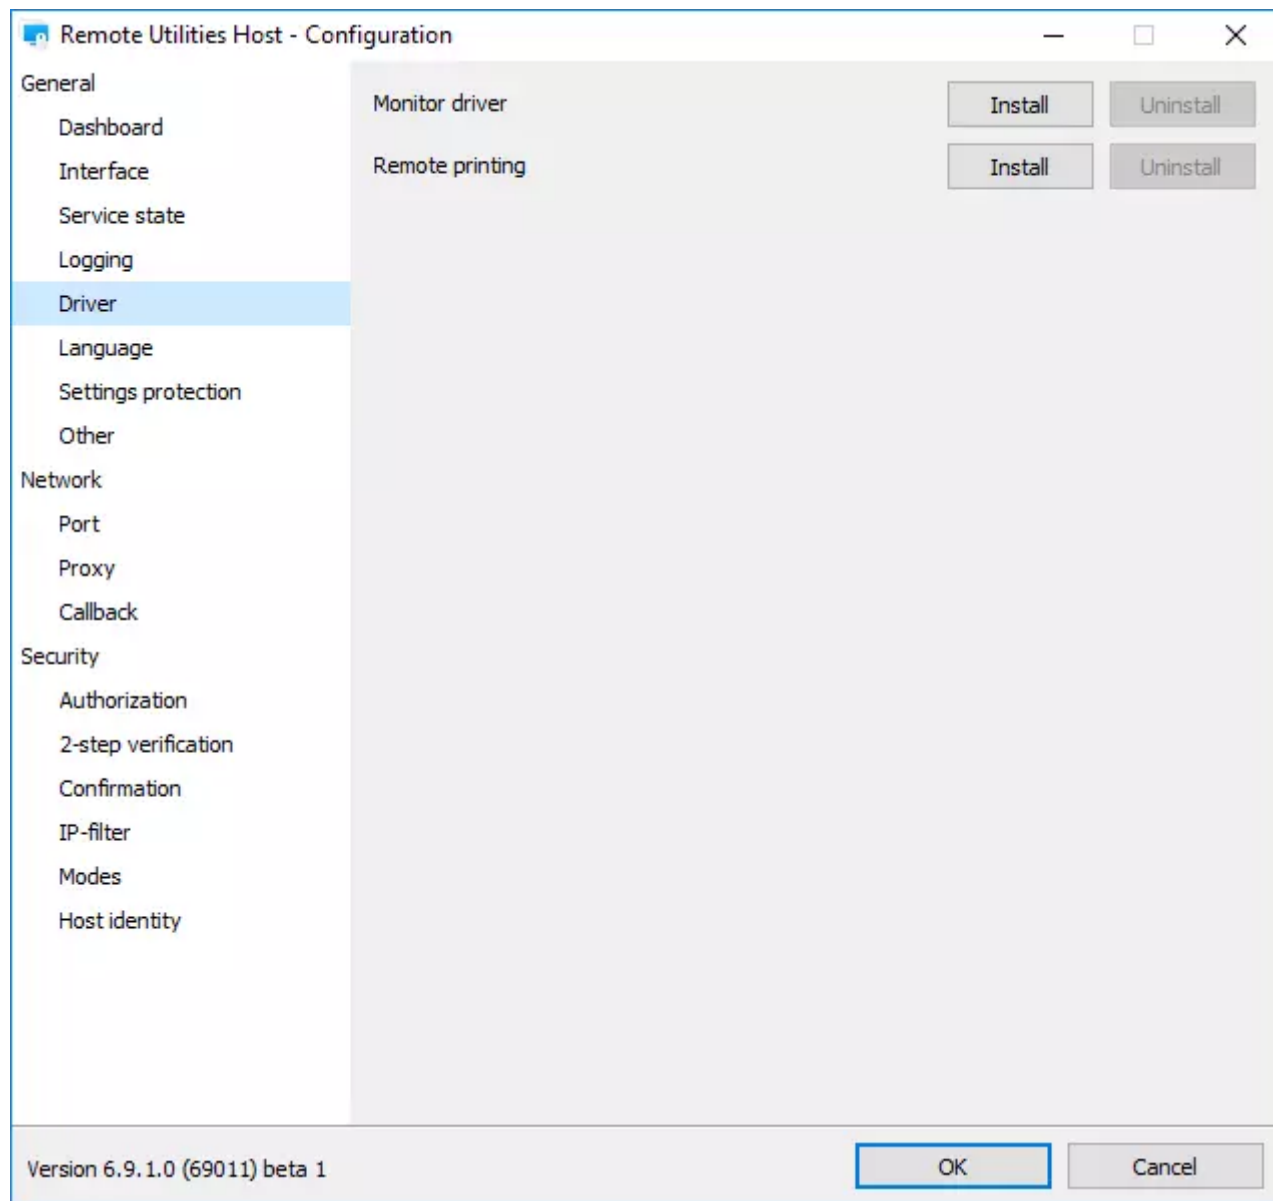

Logging

- **Use event log** - enable logging on the Host side

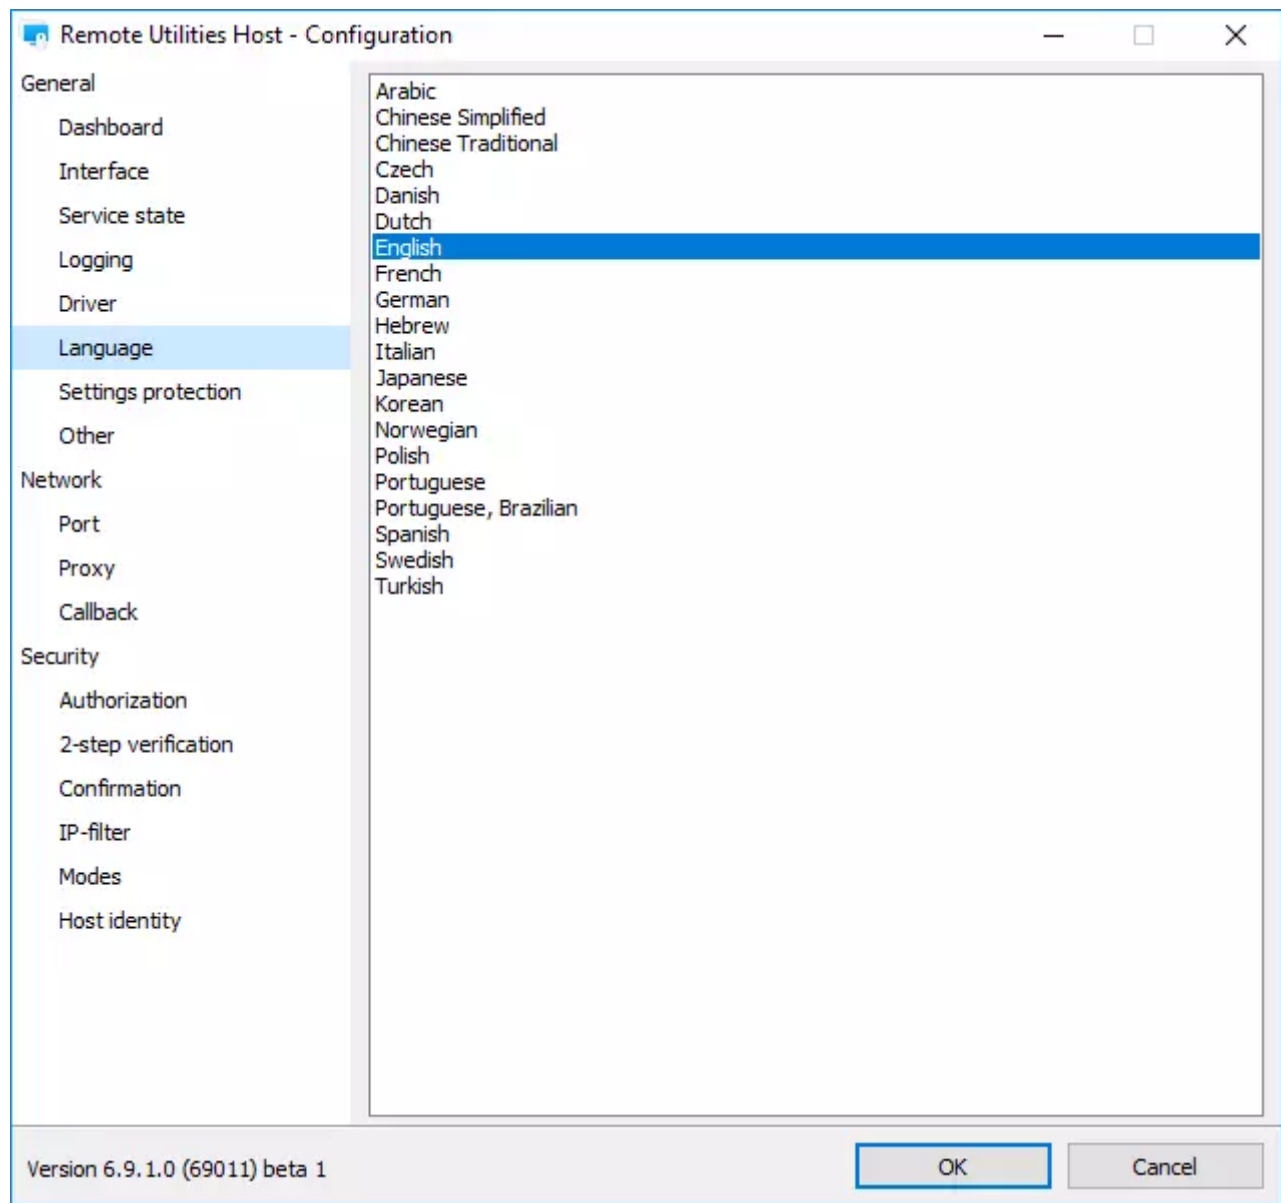

- **Show logs folder** - opens the folder where Host logs are stored (C:\Program Files (x86)\Remote Utilities - Host\Log\ is the default location)

Driver

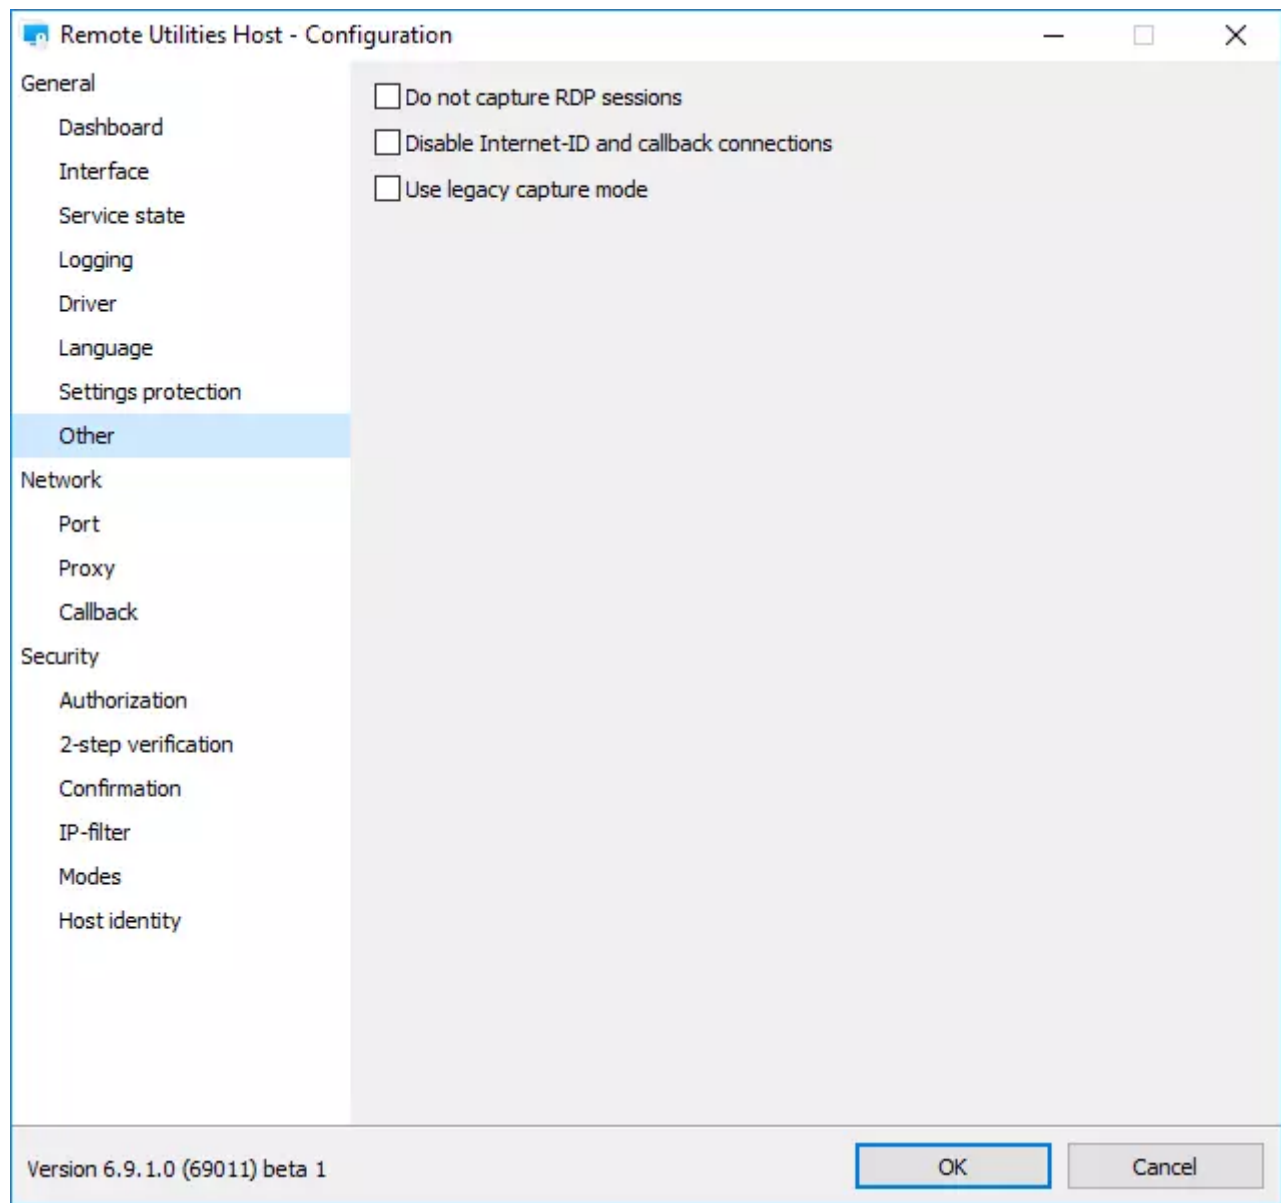

- **Remote printer driver** - install or uninstall the driver used for remote printing.

Language

Select the desired Host interface language, click **OK** and restart the Host to apply the changes.

Other

- **Do not capture RDP sessions** - enable this option, if you do not want to capture remote (RDP) terminal sessions
- **Disable Internet-ID and callback connections** - restrict this Host to accepting *direct connection* only. This can act as another layer of security in highly secure environments
- **Use legacy capture mode** - enable this option if you have issues when using the *Full Control and View* mode
