

# Server command line parameters

---

You can run *Server* executable file (`C:\Program Files\Remote Utilities - Server\InternetIdService.exe`) with command line parameters listed below.

## **Important!**

Commands must be executed as an administrator.

`/install` - install the service

`/uninstall` - uninstall the service

`/start` - start the service

`/stop` - stop the service

`/config` - open configuration window

`/firewall` - integrate with the Windows 10/8/7/Vista/XP/2003/2008/2012/2016 system firewall
